DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Response to Arguments

2. Claims 27-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Okada (US 4,894,411) as set forth in the last office action and further discussed below.

3. Claims 35-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith (US 5,407,985) as set forth in the last office action and further in view of the discussion below.

4. Applicant argued that the Okada patent does not teach polyamide spherulite but rather additive to control crystal structure or molecular structure of a resin citing a paragraph in col. 5. Applicant is invited to review the cited paragraph again. In that paragraph, it is clearly stated that “polyamide-containing resin should have a maximum spherulite diameter of 1 μ m.” (emphasis added). This clearly states that the spherulite is referred to “polyamide resin”.

5. Applicant second argument was the same as the first which states:

“The Okada reference discloses utilizing an "additive" that is a substance used to control the crystalline structure or molecular structure of the resin.”

Applicant was correct on what Okada teaches. However, Applicant failed to realize that the resin is a “polyamide-containing resin” and the crystalline structure is a spherulite with a

diameter of 1 mm or smaller depending on the application. Thus, Okada teaches the claimed invention.

6. Applicant's arguments with respect to the rejections based on the Okada patent have been fully considered but they are not persuasive for the reasons set forth above.

7. Applicant's arguments with respect to the rejections based on the Smith patent have been fully considered and are persuasive. The Smith patent teaches 'polymerized fatty acid polyamide' which is stated by Smith as more amorphous than the nylon types of polyamide resins. See Smith, col. 1, lines 45-53. Accordingly, the rejections based on the Smith patent have been withdrawn.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
